W4-S2 PRACTICE

CSS FLEXBOX

At the end of this practice, you should be able to…

- ✓ **Manipulate** CSS flexbox attributes
- ✓ **Identify** the CSS flex attributes in different use cases

How to work?

- ✓ Download **the start code** from the LMS
- ✓ Open the folder in VS Code

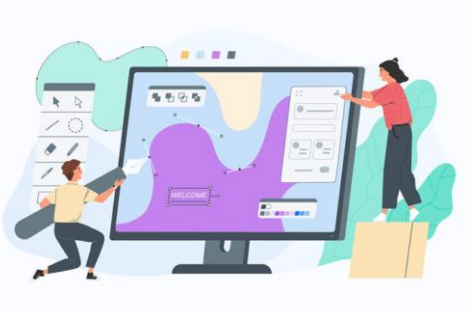

How to submit?

- ✓ **Push** your final code on **your GitHub repository**
- ✓ Then **attach the GitHub path** to the MS Team assignment and **turn it in**

Are you lost?

You can read the following documentation to be ready for this practice:

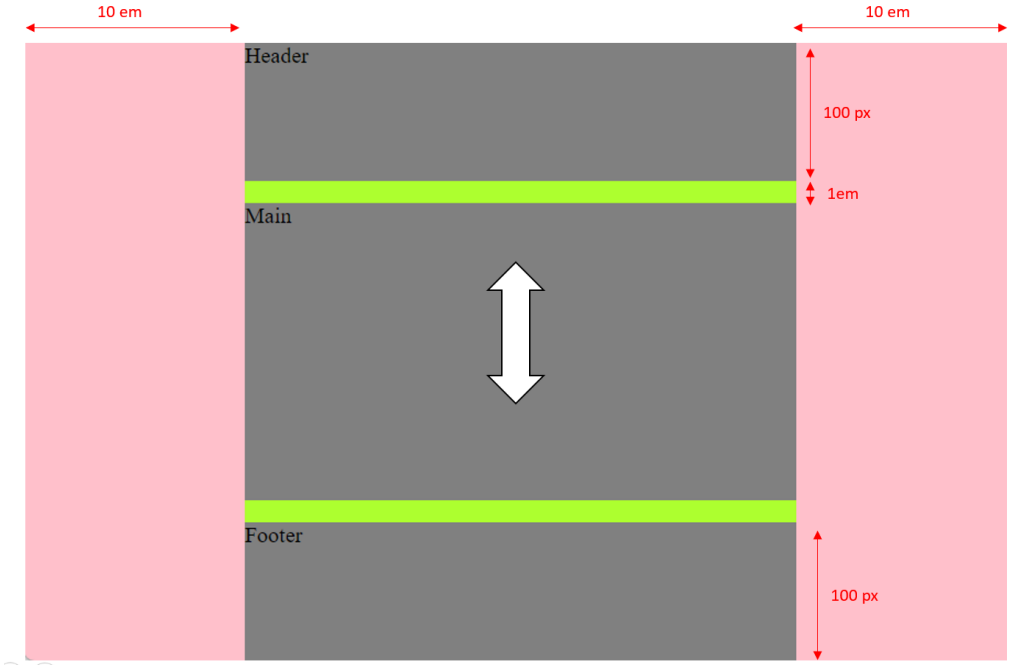

- ✓ Guide - WC3 School
- ✓ Guide - Flexbox properties
- ✓ Video – Flex in 10 minutes!
- ✓ FLEX EXPLORER

EXERCISE 1

Using flexbox, build the layout pictured below.

Warning: No absolute positions, no CSS frameworks, no JavaScript. Only flexbox!
Note: Start code is provided for this exercise!

Are you lost?

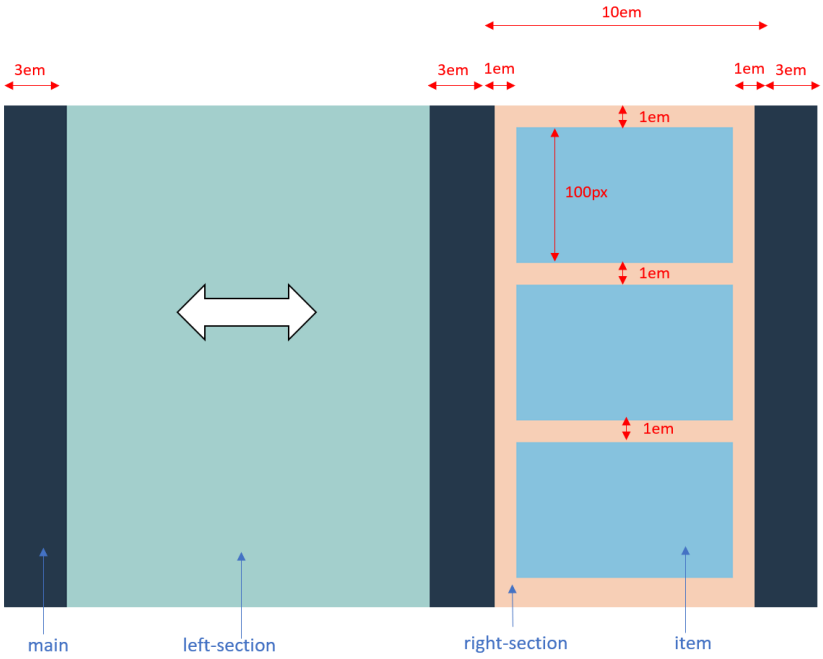

TIP 1 - Here are the CSS properties involved in this exercise:

- display
- flex-grow
- flex-direction
- gap
- height
- padding-left
- padding-right

EXERCISE 2

Using flexbox, build the layout pictured below.

Warning: No absolute positions, no CSS frameworks, no JavaScript. Only flexbox!
Note: Start code is provided for this exercise!

Are you lost?

TIP 1 - Here are the CSS properties involved in this exercise:

- display
- flex-grow
- flex-direction
- gap
- height
- width
- padding
- padding-left
- padding-right

TIP 2 - Flexbox child element can also be a Flexbox container of **other elements**.
As example here The light orange box serves two purposes:

- it is the child element of the dark blue container
- but it is also a flexbox container itself, containing two lightblue child elements.

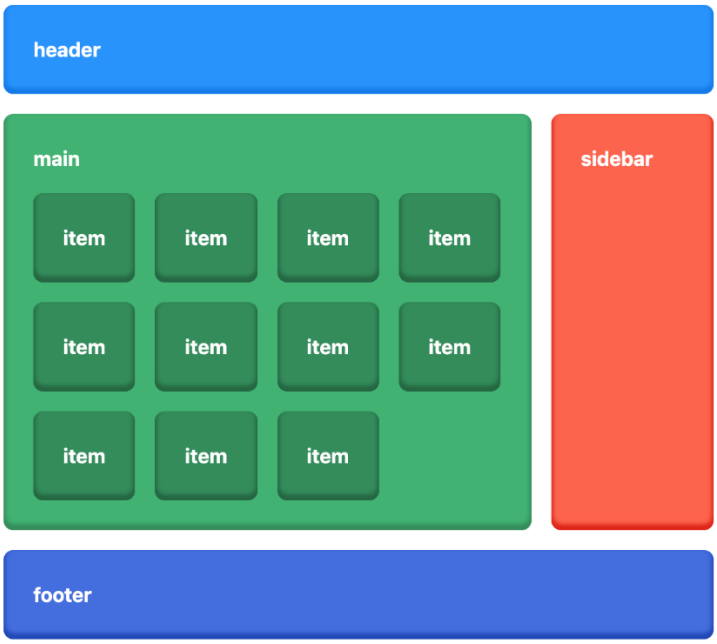

TIP 3 – You should process step by step: starting from the parent containers and going gradually to the children

- First focus on the left and right divs
- Then focus on the right div inner items

EXERCISE 3

Using flexbox, build the layout pictured below.

Warning: No absolute positions, no CSS frameworks, no JavaScript. Only flexbox!

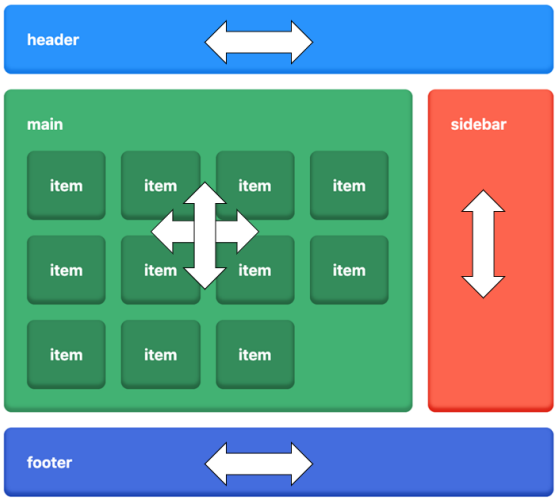

Specifications

- Border radius is 0.5rem
- Use the colors as specified
- Spacing between everything is 1rem
- The shadow is there just because I like it! you don't need to have it

	Background	Shadow
header	#1e90ff	#0077ea
main	#3cb371	#2f8d59
item	#2f8d59	#226741
sidebar	#ff6347	#e02200
footer	#4169e1	#1d44b8

Color specification

- The **growing policy** for each section is defined as follows:

- The main section should **grow until the footer**. Even without any item
